EDUCATION

University of Florida

May 2028

Bachelor of Science: Computer Science & Digital Arts and Sciences - GPA: 3.86

Gainesville, Florida

Relevant Coursework: Data Structures and Algorithms, Human-Computer Interaction, Software Engineering, Game Design + Development, Intro to Virtual Reality, Game Engine Development, Linear Algebra, Computer Graphics

PROJECTS

Gator Marketplace | *React, JavaScript, CSS, Vite, MongoDB, Auth0*

- Built full-stack campus marketplace providing UF students a secure platform to buy, sell, and trade items, conducting user testing with 20+ students to refine features and improve usability.
- Designed the React frontend with Figma-designed components and CSS styling to deliver seamless navigation.

Thorn & Thistle | *C#, Unity*

- Served as Lead Programmer for a cozy apothecary simulation game where players prescribe treatments for customer ailments, delegating development tasks and coordinating gameplay system implementation.
- Developed backend systems including inventory management, potion crafting logic, and diagnosis mechanics.

Culinara: Meal Planner and Pantry | *React Native, TypeScript, Expo, Supabase*

- Engineered mobile recipe app to reduce food waste by tracking pantry inventory, suggesting recipes from available ingredients, and syncing personalized meal plans in real-time across devices.
- Crafted interface with interactive components to generate automated grocery lists that minimize overbuying.

Pocket Oasis: Voxel World Generator | *Java, Android Studio, Game Engine Development*

- Built mobile voxel sandbox using a custom game engine with procedural world generation and grid-based terrain.
- Implemented core engine systems including virtual D-pad movement, collision detection, and object placement.

EXPERIENCE

Cardiac Data Device Software Developer

January 2026 – Present

Dream Team Engineering

Gainesville, FL

- Developed a React Native and Expo mobile app for a wearable cardiac device, displaying real-time blood pressure, historical trends, and activity correlations to support non-invasive monitoring.
- Collaborated with hardware and ML sub-teams to integrate BLE data for accurate synchronization of vitals-including blood pressure, heart rate, oxygen, and temperature, empowering continuous patient monitoring.

Lead UX/UI Director

January 2026 – Present

Society of Hispanic Professional Engineers (SHPE UF)

Gainesville, FL

- Coordinated with VP of Technology to define design priorities and assign UI/UX deliverables to design team members supporting iOS, Android, and SWE development teams.
- Led creation of user-centered interface designs in Figma for our 300+ members, developing wireframes and high-fidelity prototypes while ensuring consistency across platforms and alignment with SHPE branding.

Secretary

April 2025 – April 2026

Hispanic Student Association (HSA)

Gainesville, FL

- Streamlined administrative workflows for 200+ member organization by implementing standardized processes for event planning, room reservations, and inter-departmental coordination with university offices.
- Supervised 3-member communications team (Webmaster, Newsletter Director, Assistant Secretary) to maintain member engagement through a React/Firebase portal tracking attendance points and voting eligibility.

TECHNICAL SKILLS AND AWARDS

Languages: JavaScript, TypeScript, HTML/CSS, C++, Python, Java, C#, Processing, SQL

Frameworks & Libraries: React, React Native, Next.js, Node.js, Tailwind CSS, Vite, Expo, Firebase, Supabase, MongoDB, Auth0

Design & Development Tools: Figma, Git, VSCode, Unity, Blender, Maya, Jira, CLion

Programs: UF's Engineering Leadership Circle Honor Society, UF Reitz Scholar, UF Honors College, Codepath Technical Interview Prep 101 Course

Awards: Benacquisto Scholar, National Merit Scholarship Finalist, National Hispanic Recognition Program Finalist
